Subject: 2024 Local Street Improvements - Update September 6, 2024

Preliminary Project Schedule Provided by Contractor

Thank you for your patience throughout the project. We hope you enjoy the new streets. The contractor will work on corrective items and restoration over the coming weeks. **As grass becomes established, we encourage residents to trim grass. This will help restrict weed growth and assist the grass growth**

The contractor will be responsible for getting the new seeding established in the terrace so that it covers the entire area to a height of 2-inches. The Village of Prairie du Sac specifies the contractor use Madison Parks or an approved equivalent grass seed. Madison Parks grass seed is a mixture of superior turfgrass varieties that thrive in full sun or light shade. It is excellent for new lawns or upgrading existing turf which establishes quickly and permanently. It may take up to **two years** for the lawn in the terrace area to be fully restored, depending on various factors. UW-Extension recommends setting your mower at 2½ to 3 inches to allow grass to be dense and have a deeper root system. UW-Extension also recommends you mow frequently, keep the mower blade sharp, and return the clippings to the lawn. Taller grass and frequent mowing can aid in preventing weed growth. The Village recommends you begin mowing once the grass has reached a height between 2½ to 3 inches. You may choose to water the grass to aid in its growth, especially during the warmer temperatures. However, the Village will not reimburse such costs.

What Happened Week of September 3rd

- Project Review

What to Expect Going Forward

- Miscellaneous site cleanup
- Restoration touch up
- Corrective items

Project Overview

5th Street Reconstruction – Grand Avenue to Prairie Street

- Reconstruction of the curb and gutter, road base, and asphalt pavement
- Replacement of water main, water services, and substandard sanitary sewer
- New storm sewer extensions
- New Sidewalk on east side of 5th Street and spot sidewalk replacement

VFW Drive - 8th Street to Water Street

- Reconstruction of the curb and gutter (new), road base, and asphalt pavement
- Replacement of water main and water services
- Replacement of sanitary sewer and sanitary services

- Storm inlet installation
