Volume Charge

First 10,000 gallons used each month - \$1.44 per 1,000 gallons

Next 57,000 gallons used each month - \$1.04 per 1,000 gallons

Over 67,000 gallons used each month - \$0.87 per 1,000 gallons

Billing: Bills for service are rendered monthly and become due and payable on the first of the month following the period for which service is rendered. A late payment charge of 1 percent per month will be added to bills not paid within 20 days of issuance. This late payment charge will be applied to the total unpaid balance for utility service, including unpaid late payment charges. The late payment charge is applicable to all customers. The utility customer may be given a written notice that the bill is overdue no sooner than 20 days after the bill is issued. Unless payment or satisfactory arrangements for payment is made within the next ten days, service may be disconnected.

Combined Metering: Volumetric meter readings will be combined for billing if the utility for its own convenience places more than one meter on a single water service lateral. Multiple meters placed for the purpose of identifying water not discharged into the sanitary sewer are not considered for utility convenience and shall not be combined for billing. Meter readings from individually metered separate service laterals shall not be combined for billing purposes. Buildings used in the same business, located on the same parcel and served by a single lateral may have the customer's water supply piping installed to a central point so that volume can be metered in one place.
